John Eccles is today mainly remembered for his theater works but as master of the king's and queen's music he was also the principal composer of ceremonial court odes for William III and Anne producing some twenty New Year odes and fourteen birthday odes during his thirty-five years in the post twice as many as Henry Purcell's output in the same genre. The fact that his odes are so little known today is partly due to how few survive; music is extant for only five odes, three of them incomplete. This volume presents the first complete modern edition of Eccles's surviving court odes. There is much superb music awaiting discovery here. By the time he wrote his first odes Eccles was already a seasoned theater composer and his odes can be equally dramatic and virtuosic. At the same time they demonstrate confident control both of the choral and orchestral forces at his disposal and of the work's large-scale architecture.

John Eccles's active theatrical career spanned a period of about sixteen years, though he continued to compose occasionally for the theater after his semi-retirement in 1707. During his career he wrote incidental music for more than seventy plays, writing songs that fit perfectly within their dramatic contexts and that offered carefully tailored vehicles for his singers' talents while remaining highly accessible in tone. This edition includes music composed by Eccles for plays beginning with the letters R-W, along with secular songs and catches by Eccles that were not associated with plays. These plays were fundamentally collaborative ventures and multiple composers often supplied the music. Thus this edition includes all the known songs and instrumental items for each play. Plot summaries of the plays are given along with relevant dialogue cues, and the songs are given in the order in which they appear in the drama when known.
